# SOLAR PRODUCTS

**P**art of the AEG family with a hundred-thirty-year tradition as a leading German brand in the field of electrical appliances -owned today by Electrolux Group- AEG photovoltaic products stand out for their reliability, quality and enhanced usability, aesthetically pleasing and with embedded innovation to grant you full control over your PV system and its outputs.

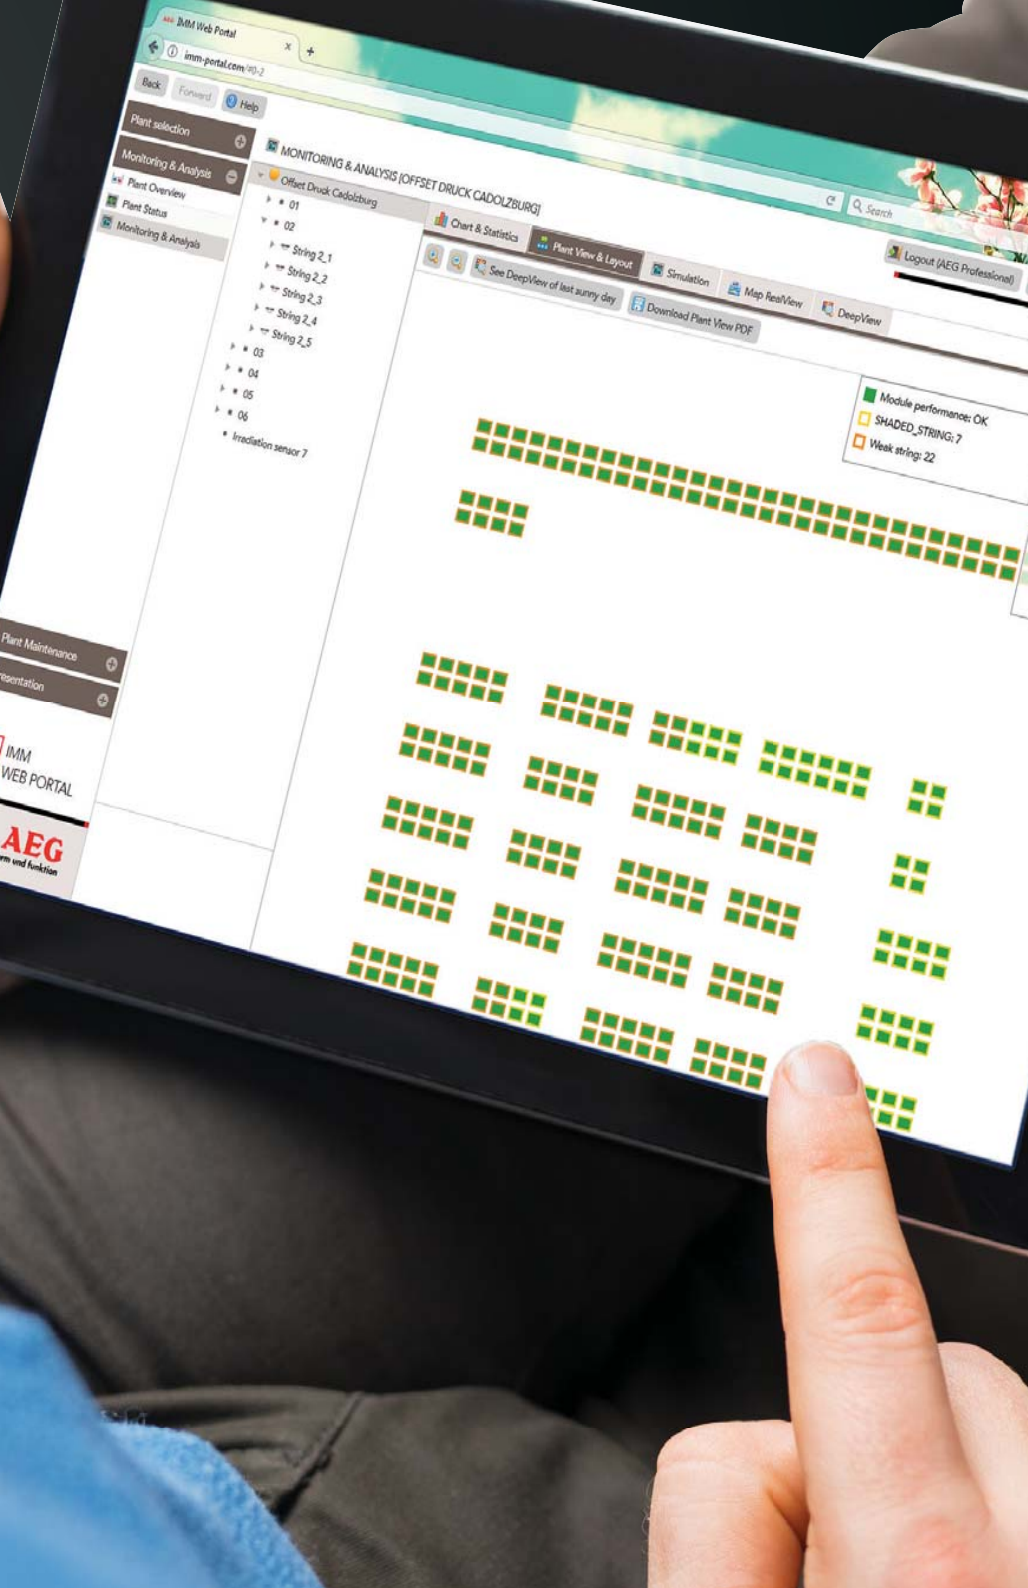

Uniquely, the AEG IMM Technology (Individual Module Monitoring) allows any solar module to get smart and makes it capable of diagnosing its own health and performance status. This significantly reduces Operation & Maintenance issues, improves system yields and more importantly gives you peace of mind and full control over your installation.

**B**ringing to the international markets AEG quality solar products, Solar Solutions Group is present in 16 countries

worldwide. Solar Solutions carefully selects suppliers according to rigorous audit processes carried out by independent Quality Assurance bodies, to offer customers certified quality they can rely on. Proximity to each market further allows Solar Solutions to develop tailored solutions to address your specific needs.

“

Each AEG product is developed to be one idea ahead in the world of interconnected, smart solar devices

# RELAX AND WATCH ENERGY HAPPEN

## YOUR PLANT: MANY QUESTIONS...

Is your solar plant working as it should?

What might be the technical problem behind that energy loss?

Can you save in costly maintenance programmes and make your plant work more efficiently?

## ...ONE ANSWER: IMM

Gain full insight into the performances of each individual module and take control of your solar installation with AEG IMM (Individual Module Monitoring).

IMM is a unique solar plant monitoring technology at module level for smart plant management run by artificial intelligence.

Enjoy the peace of mind given by smart monitoring and relax - you are in control.

## CONTROL

Enjoy total control over your power plant performance thanks to deeper system understanding

## TRACK

Track technical issues in your power plant down to the specific single module location

## DIAGNOSE

Diagnose the root cause of downtime and low efficiency thanks to vast data analysis capability

## BE INFORMED

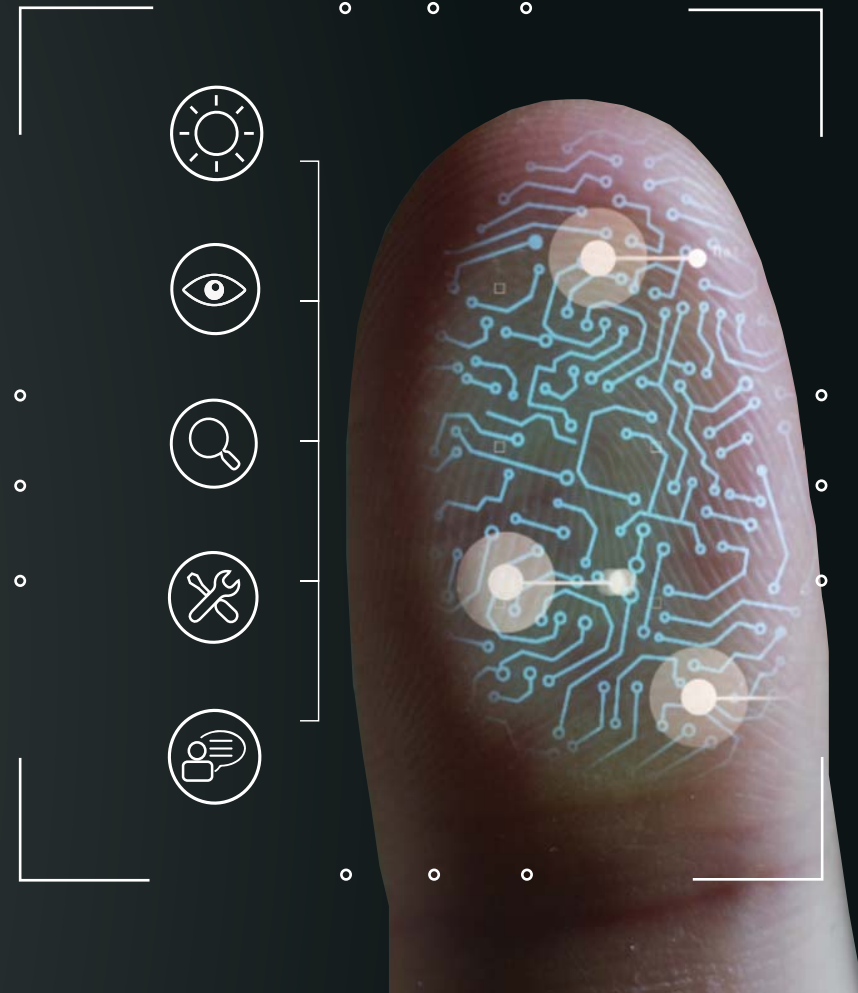

Be informed of developing problems with real time alerts

## REDUCE

Reduce the number of maintenance visits and increase their precision

# YOUR SOLAR PLANT AT YOUR FINGERTIPS

# AEG: 360° SOLUTIONS TO FIT ALL NEEDS

## COMMERCIAL & UTILITY

High efficiency polycrystalline & monocrystalline solar modules with integrated IMM for smart monitoring

## RESIDENTIAL

Reliable installations with quality solar modules and domestic inverters for consistent yields

## SMART UPGRADE

Advanced diagnostics of existing domestic and commercial power plants with IMM Upgrade

## REPOWERING

Refitting of large-scale solar plants with custom products tailored to the individual plant

The AEG product portfolio encompasses a wide range of photovoltaic products satisfying the need for flexibility and reliability in today's solar plant planning whatever the size of installation.

# Product PORTFOLIO

AEG solar modules are made of selected and tested components to ensure the highest quality, reliable efficiency and a long product life.

### INTEGRATED IMM

Solar modules with integrated monitoring technology (IMM)

### IMM UPGRADE

Smart monitoring upgrades (IMM) for existing power plants

### INVERTERS

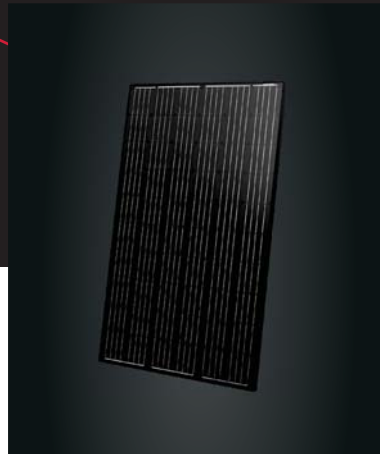

Solar inverters for residential and commercial installations

### HIGH EFFICIENCY

High efficiency mono- and polycrystalline solar modules

### GLASS-GLASS

Double glass solar modules for harshest environments

### REPOWERING

Custom modules for repowering of failing solar plants
